

POD v4 Welcome Window

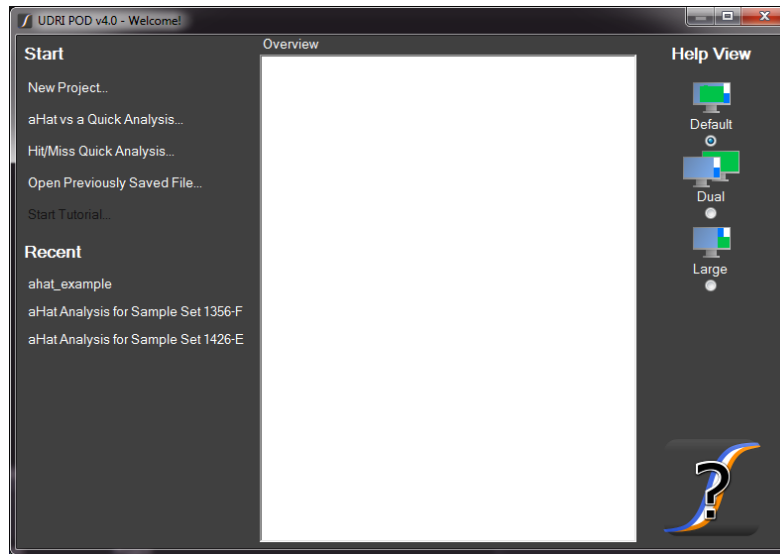

Figure 1 - POD v4 Welcome Window

Purpose:

The POD v4 Welcome window helps new users understand what their options are and helps established users quickly get to what they want to do. It is always the first window that is shown when opening the software.

Available Actions:

- **New Project...** - Starts a new POD v4 project.
- **aHat vs a Quick Analysis...** - Start a new aHat vs a Quick Analysis
- **Hit/Miss Analysis...** - Start a new aHat vs a Quick Analysis
- **Start Tutorial...** - Brings up a short tutorial explaining how to use POD v4.
- **Open Previously Saved File...** - Brings up a file browse dialog to open .pod files.
- **Help View** - Set one of the available help views as your preferred view. (Default, Dual, Large)
- **Open Help** - View this document.
- **Close POD v4** – Close POD v4 in case you accidentally opened it.

Tips for Using the Welcome Window

- Every item shown on the welcome window has additional information available. Simply move the mouse cursor over any item and the information will be available in the Overview text box.
- Placing the mouse cursor over any of the Most Recently Used files in the list will show details of the contents of the file. This allows you to see what is in the file without having to open it.
- Take the tutorial if this is your first time using POD v4. It is short but it will make using the software much easier.
